

MULAG

Comet
Certified Refurbished GSE

MULAG-Quality in every detail

Our Comet towing tractors are perfect to be used in many working situations on airports and in the industry. Their design is based on an independent chassis especially developed for that purpose. Thus we achieve optimal load balance and outstanding dynamical characteristics as well as quick and easy access to all important service points and components.

Certified refurbished MULAG products provide you with an excellent and cost-effective alternative to new products. That goes along with a manufacturer's warranty of 6 months and the advantage of a complete refurbishment by the original manufacturer – a new level of quality for the used vehicle market compared to standard offers.

If your operation requires efficient and well-adapted tractors and does not require the acquisition of a new vehicle this is the solution for you.

The sophisticated design of MULAG towing tractors make their use highly economical and efficient:

- High-quality workmanship of the tractors based on MULAG standards in design and construction.
- Low wear due to the use of especially hardened materials on critical points of the vehicle.
- Overdimensioned vehicle specifications establish powerful advantages in daily intensive use.
- Well-designed operator's ergonomics with excellent view onto the working area results in productivity.
- Fast and reliable long-term availability of spare parts and service information provided online by MULAG connect 24/7.

Certified Refurbished GSE

Begin of refurbishment

Used vehicle is brought back to MULAG for further processing.

Evaluation

The condition of the vehicle is assessed on the basis of a comprehensive checklist. This is where our decades of experience with ground support equipment come in.

Reconditioning and repair

Together with proven partners, we renew the vehicle from scratch, addressing drive train and engine as well as bodywork and painting.

Adjustment and testing

The vehicle is optimally adjusted again and the restored condition is extensively tested.

Our workflow for certified quality

	MULAG-Check
Quality checklist	
Documents and markings	✓
Safety and security	✓
Vehicle chassis	✓
Operator's cab	✓
Driving characteristics	✓
Steering System	✓
Braking system	✓
Electrical system	✓
Drive unit (axles and transmission)	✓
Engine	✓
Suspension system	✓
Hydraulic system and lubrication	✓
Bodywork and painting	✓

Only with a strictly defined workflow it is possible to guarantee top-level quality.

Systematic reprocessing is the solution

The expertise of being one of the leading manufacturers of GSE in Europe has a positive effect on the quality of our remanufacturing process: With first hand experience of designing and manufacturing towing tractors for decades we only want to deliver top services. In order to guarantee this, our Comet tractors are checked and reconditioned in a precisely defined quality procedure using more than 60 quality parameters.

Your benefits

Our offer provides you with a cost-effective solution for procuring, replacing or securing a GSE fleet. The reconditioned tractors are reliable and safe with a greatly extended service life compared to other used tractors on the market.

Fast availability is another major advantage. Optionally available equipment packages can also be ordered for industrial and military applications.

Certified Refurbished GSE

Each of our reconditioned vehicles fulfils the practical requirements for professional use and also the strict MULAG quality standards. In order to guarantee this, our Comet tractors are checked and reconditioned in a precisely defined quality procedure using more than 60 quality parameters.

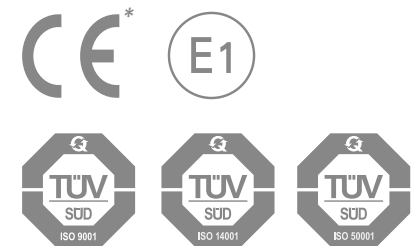

- Cost-efficient solution
- Checked quality standards
- High availability
