

MULAG connect

*Get product information online
Order spare parts quickly and easily*

Quick information about MULAG's new service portal

Spare parts and product information online!

MULAG connect is a convenient online spare part ordering and product information system which enables you to work quickly and efficiently. All you need is internet access to take advantage of the portal anywhere and at any time.

For each product you can now call up **the corresponding individual spare parts list including technical drawings** and order spare parts directly if required. Furthermore **operating manuals and wiring diagrams** for each product can be viewed and downloaded.

The benefits are obvious – MULAG connect enables you to identify and order spare parts quickly and efficiently and gives you access to detailed product information.

If you are interested in using MULAG connect **please feel free to get in touch** with our After-Sales Service. Your registration as a MULAG connect user is quite simple.

For more details please do not hesitate to contact us.

Your MULAG Service Team
